

Provincial Insurance Comp'y.

It appeared from the Annual Report that while passing through a year of pecuniary embarrassment, without precedent in Canada, the Company had suffered from the depression. The year's business showed a balance of \$24,621, despite this disadvantage.

The liabilities of the Company were \$81,707, being *£47,324 less than the amount due on 31st*

The total receipts of the Company for Premiums were \$169,780. To pay off the debt of the Company the Stockholders authorized the issue of Debentures based upon the security of the unpaid Capital, which amounts to \$1,400,000.

The following gentlemen were elected Direc-

! re.

Geo. Duggan, Jr.,
Hon. W. B. Robinson,
J. S. Howard,
Capt. P. Wallace,
Lewis Moffatt,
E. F. Whittmore,
John Cameron, M. P. P.,

directors, the Hon. J. HILLIARD CAMERON was elected President, and E. F. WHITTEMORE Vice-President. The list of stockholders, which is printed with the Annual Report, speaks for itself as to the character of the proprietary of the Company, and may be inspected at the office of the Agent,

J. HILLYARD CAMERON,
President,
Belleville, Nov. 2, 1858.

THE
Railroad Celebration

**ANNIVERSARY OF THE
QUEEN'S VISIT TO THIS TOWN**

[T will be conducted on a most magnificent scale. It is calculated to eclipse that of the City of Montreal, and thereby place the Capitol of Lower Canada in the shade.

VARIETY AND ABUNDANCE OF HARDWARE
which will be required for the occasion, must be very considerable; and in consideration thereof, the committee of the BELLEVILLE RAILROAD

Co's,
la

HARDWARE ESTABLISHMENT
-OF-
M. GILLEN,
where they will find a genuine and complete
assortment of
 **HARDWARE**

Mr. G. flatters himself with the idea that, from his knowledge and experience in the above line of business, and the large and peculiar selection of goods JUST ARRIVED, that he occupies a position which will enable him to please the fastidious, the point of style and quality, patronage on Monday.

"There's no Time to be Lost,"

PHONOGRAPH!
 WRITING BY SOUND!
 PHONOGRAPH was invented by ISAAC
 PITMAN, of Bath, England, in this year
 1847. It is the most simple, most natural, most
 perfect, and most useful system of writing
 which has ever been or ever can be invented.
 It is the only system of writing that has
 thousands of persons in England and America,
 both in public and private life, have learned to
 use. It is the only system of writing that
 business letters annually pass through the
 hands of thousands of persons.
 It is the greatest popularity to be wondered at.
 The present system of writing is exceedingly
 complex, and totally useless. How days
 of progress and innovation. Phonography is
 the only system of writing that is simple,
 and can be written *as one speaks*.
 In other words, the labor of six days can
 be done in six hours. It is the only system
 of writing that is so simple, and so easy,
 that it can be learned in six hours.
 So simple is the system, that
 a person can learn to write in six
 hours. An hour's daily practice for a few
 weeks will enable any person to write. Phonography
 is the only system of writing that is so
 simple, and so easy, that it can be learned
 in six hours. The same amount of practice will
 enable a person to take up any system of
 writing, German, or conversation, and to read
 them with accuracy.
 The *Y. M. S. of Boston*, says: "I deem
 Phonography an invaluable aid to education.
 It is the only system of writing that would
 not be parted with in manhood for thousands
 of dollars." It is presented with a valuable report
 of its history, progress, taken by a little
 book, which is sent free of charge. It has
 been known 40 years and will have known
 100 years in 1859. It is the only system
 of writing that is so simple, and so easy,
 that it can be learned in six hours. It is the
 only system of writing that is so simple, and
 so easy, that it can be learned in six hours.
 It is the only system of writing that is so
 simple, and so easy, that it can be learned
 in six hours. It is the only system of writing
 that is so simple, and so easy, that it can
 be learned in six hours. It is the only system
 of writing that is so simple, and so easy, that
 it can be learned in six hours. It is the only
 system of writing that is so simple, and so
 easy, that it can be learned in six hours.
 It is the only system of writing that is so
 simple, and so easy, that it can be learned
 in six hours. It is the only system of writing
 that is so simple, and so easy, that it can
 be learned in six hours. It is the only system
 of writing that is so simple, and so easy, that
 it can be learned in six hours. It is the only
 system of writing that is so simple, and so
 easy, that it can be learned in six hours.
 It is the only system of writing that is so
 simple, and so easy, that it can be learned
 in six hours. It is the only system of writing
 that is so simple, and so easy, that it can
 be learned in six hours. It is the only system
 of writing that is so simple, and so easy, that
 it can be learned in six hours. It is the only
 system of writing that is so simple, and so
 easy, that it can be learned in six hours.
 It is the only system of writing that is so
 simple, and so easy, that it can be learned
 in six hours. It is the only system of writing
 that is so simple, and so easy, that it can
 be learned in six hours. It is the only system
 of writing that is so simple, and so easy, that
 it can be learned in six hours. It is the only
 system of writing that is so simple, and so
 easy, that it can be learned in six hours.
 It is the only system of writing that is so
 simple, and so easy, that it can be learned
 in six hours. It is the only system of writing
 that is so simple, and so easy, that it can
 be learned in six hours. It is the only system
 of writing that is so simple, and so easy, that
 it can be learned in six hours. It is the only
 system of writing that is so simple, and so
 easy, that it can be learned in six hours.
 It is the only system of writing that is so
 simple, and so easy, that it can be learned
 in six hours. It is the only system of writing
 that is so simple, and so easy, that it can
 be learned in six hours. It is the only system
 of writing that is so simple, and so easy, that

Also, the

ladies and Gentlemen; and assorted sizes and colors Printing Cards, at very low prices.

It is evident that, from this system, of which I give a brief outline more by way of suggestion than description, the greatest benefit arises to the public at large. I have myself witnessed numerous instances of its happy results; and if this feature of the French common-law, now widely studied, I am glad to say, by gentlemen of the American Bar, perfecting abroad their legal attainments, could be adapted to the exigencies of our own code, there can be no question, I think all true lovers of our country and her institutions will admit, that it would be productive of an immense amelioration in our minor Federal courts.

British and Canadian Atlantic Telegraph Company.

From the Montreal Gazette.

We are glad to learn from a private letter by the *Asia*, that the House of Lords have passed through the bill to incorporate the British and Canadian Atlantic Telegraph Company.

Company—on this side of the ocean, the Canadian and British Atlantic Telegraph Company. We further learn that application was to be immediately made to the King of Denmark, for permission to carry the wires through the Danish Colonies and place stations in them. It was believed that an exclusive permission would be obtained.

will be taken to the Labrador coast—suppose Forteau Bay in the Straits of Bellefleur, as soon as possible. Parties in England desire to have this step taken this fall, but it is now clearly too late in the season. The extension of the telegraphic wire to Forteau Bay we have for years considered an important project.

It was proposed to the Canadian Parliament some four or five years ago, by the Hon. John Young, "it will place us one day nearer Europe than Cape Race places New York; and it will have this further advantage over Cape Race, that it will be always certain, which Cape Race is not. We

lieve, however, that the cable across the North Atlantic, with stations in Danish waters, will be successful, and if it is, will supersede the Forteau Bay station for news for Europe; but this we ought to have as soon as possible, pending the construction of the greater work. The only dangers apprehended to the proposed line are those of the North Atlantic.

by way of the Danish Colonies, are from
teebegs, and we do not think the risk from
them is formidable. We hope to see the
Atlantic Telegraph quietly put in good
working order, enlightening the people of
the eastern hemisphere of the events of the
western and *vice versa*, before the discussion
of the practicability of the other scheme
quite completed.

FOR TESTING EGGS.

In a book recently published abroad, entitled the 'Curiosities of Food,' is given the following simple method of testing eggs:—There is no difficulty in testing eggs; they are mostly examined by a candle. Another

why to tell good eggs is to put them in a pail of water, and if they are good they will lie on their sides, always; if bad they will stand on their small ends, the large ends always uppermost, unless they have been shaken considerably, when they will stand either end up, never on the side. An egg that lies flat is good to eat, and can be depended upon. An ordinary method

to take them into a room moderately dark and hold them between the eye and a lamp or candle. If the egg be good—there is if the albumen is still unaffected—the light will shine through with a reddish glow, while, if affected, it will be opaque, dark.

lighly hard butter in summer, without ice, the plan recommended by that excellent and useful publication, the *Scientific American*, a year ago, is a good one. Put a trivet, or any open flat thing with legs, in a saucer, and put on this trivet the plate of butter, and fill the saucer with water; turn a common flower-pot upside down over the butter, so that its edge shall be within the saucer and under the

water. Plug the hole of the flower-pot with a cork, then drench the flower-pot with water. Set in a cool place until morning, or, if done at breakfast, the butter will be very hard at supper time. How many of our city boarding school girls, who have been learning philosophy, astronomy, syntax and prosody, can write us an explanation of this within a month?

POSTAL REGULATIONS.—Nearly every reading room in the country has been closed, in consequence of the newspaper postage imposed by the Government. In the larger towns, where files of foreign and domestic journals were supplied at a heavy cost, the postage has proved the one straw to break the camel's back, and one by one we find them closing up. In rural sections, where Mechanic's Institute

trasted to the generosity of publishers, and furnished reading gratuitous to the community, the new postage law has proved a fatal blow, and one after another these institutions that government heretofore was wont to foster are ceasing to exist. It is not an intelligent community ministers wish us to be.—*Woodstock Times*.

waukee *Wiscoinein* has no doubt that the crop of Wheat now harvested in that State is larger than in any former year. It estimates the amount at 14,000,000 bushels, and allowing 4,000,000 for consumption, there will be 10,000,000 bushels for export. The *Wiscoinein* does not anticipate high prices, but claims that the excellent quality of the wheat will create a demand for it among millers. It urges wheat raisers to clean their wheat care-

“An Englishman, in one of our towns, was boasting of his country, and among the rest, he said:—“There are springs in our country where the most sparkling soda water can be had already prepared.” “Why, that is nothing to a lake out west,” said one of his neighbors, “with a next-to-nothing countenance.”

where there is the most delicious champagne, already bottled, and the banks are made of spongecake."

AMERICAN SNOBBERY.—If there is anything utterly snobbish, it is the practice of publishing an account of the dresses and jewels of any fool of fashion who happens for the time being to be the observed of gaping observers. Who cares how many diamonds she has, or who furnished the same, or at what cost?

Five years ago, when a woman was

thirty years of age, it would be said, possibly speaking, that thirty springs had passed over her head. Now-a-days, a young woman at eighteen has *thirty* springs pass over her head every morning.
